【About Qtum】

Qtum is an open source blockchain project that was released in December 2016. It is designed to combine the best of Bitcoin (BTC) and Ethereum (ETH), and to solve the problems that have been identified with blockchain platforms. Its currency unit is " QTUM ".

It has formed alliances with Amazon Web Service and Google Cloud, and aims to provide a highly customizable service that enables companies to code, deploy, and execute smart contracts for blockchain development.

DeCurret

【About DeCurret】

Based on the concept of "connecting and simply exchanging all values," we were established in January 2018 with the aim of becoming the "main bank of digital currencies" that sets the standard for safe and convenient digital currency transactions. It provides value exchange services with the main functions of "storage," "exchange," and "sending/receiving" of digital currencies, and in the two-way exchange service for physical trading of cryptoassets provided since April 2019, it handles five types and nine issues of cryptoassets, and in August of the same year, it launched a service that allows users to charge electronic money from cryptoassets. Furthermore, in 2021, we have launched a service for the sale and operation of mining machines and an order-book exchange service, and we are taking on the challenge of developing creative products that will promote the use of digital currencies by all people.

■ Company Overview

Name: DeCurret Inc.

URL: <https://www.decurret.com/>

Location: 2-10-2 Fujimi, Chiyoda-ku, Tokyo

Representative: Kazuhiro Tokita, President & CEO

Business description: Financial services involving trading and settlement of digital currencies

Virtual Currency Exchange Operator - Kanto Local Finance Bureau No. 00016

Certified Fund Settlement Firms Association: Japan Virtual and Crypto assets Exchange Association

■ Main risks when trading cryptoasset s

- A cryptoasset is not a fiat currency. A cryptoasset we handle is a "decentralized cryptoasset" traded and issued over the internet, and its value is not guaranteed by any specific states or other parties.
- Use or possession of a cryptoasset may be restricted in certain countries/regions under their laws and regulations.
- A cryptoasset trade may result in a loss or significant decrease in value of the cryptoasset from price fluctuation.
- Differences exist between buying and selling prices in cryptoasset trades. During times of high market volatility or decreased liquidity, the differences between buying and selling prices may increase, the acceptance of orders may be interrupted, and so on. Customers may therefore be unable to complete transactions as intended.
- A cryptoasset itself may lose all value due to breakdowns in the systems for transferring the cryptoasset, or other reasons.
- In case the company's business is interrupted by events including bankruptcy, we may not be able to return the deposited money and cryptoasset to the customer.
- If the private key is lost, the customer may not be able to access the cryptoasset in the portfolio which may result in decreased value. In addition, if the private key becomes known to a third party, the customer may incur unexpected losses.
- A cryptoasset may be used for payment of consideration subject to agreement by the counterparty receiving such payment.
- When entering into a cryptoasset transaction, read the "Document Prior to Execution of Contract" and "Overview of Cryptoasset" in advance and conduct transactions with sufficient understanding, at the customer's own decision and responsibility. If there are any questions, the customer is to confirm prior to the start of transactions.

DeCurret

- The order price displayed in the trade screen at the time the order was placed may differ from the actual contract price. It may be caused when it has taken long for our trading system to execute the order after it is received from the customer, as a result of communication issues between the device of the customer and our trading system, sudden changes in the price of the currency, etc. This may work to the customer's advantage or disadvantage.
- Customers may be unable to complete transactions as intended, due to factors such as a disaster, communication failure of public lines, delay in processing by the framework for recording transfer of cryptoasset value, and other events beyond the control of the Company.
- We may charge a specified fee for each product or service. For details, please refer to <https://www.decurret.com/fees/>.
- The term "cryptoasset" refers to a cryptoasset as defined in Article 2, Paragraph 5 of the Law on Funds Settlement, but we may use the terms "virtual currency" or "cryptoasset (virtual currency)" on some screens.
